ENTRIES OPEN FROM 1 JULY 2022 TO 30 SEPTEMBER 2022

WORDFIND COMPETITION

WIN 1 of 2 SAECOWilson Titanium Digital Auto Darkening Welding Helmets supplied by SAECOWilson worth \$160 RRP

Find 10 letters scattered throughout the magazine which spell a common tool. All correct entries will go in the draw. Entries close 1/9/2022. See page 2 for more.

From the Desk of the Marketing Manager

In this edition of NZworkbench, we take a look at Mechanical Seals and the KLINGER gasket range on pages 13, 14, and 15 - offered by Seal Innovations, a division of Motion New Zealand. We also explore the GROB linear motion products available through the SAECOWilson network.

Our cover competition is sponsored by CRC. Purchase any CRC product on the cover, page 2 or page 3, and stand a chance to win an iPad 5 mini worth \$849. You can also go into the draw to win a fantastic Gold Coast experience with the Shell V-Power Supercars Racing Team valued at \$6,000!

Our Wordfind competition has two SAECOWilson welding helmets up for grabs. Be sure to check out the apprentice tool kits on page 11, and our super hot specials on pages 22 to 25.

As always, our dedicated team of experts are standing by to help you get the job done.

WORDFIND COMPETITION

Find hidden in this issue 10 letters which make up the name of a common tool. Find all the letters (*like this W*) to spell the tool. Email your answer, name, company, address and phone by **1 September 2022**. A correct entry will be randomly drawn and the winner will be notified.

GROB Linear Push/Pull Chain

SAECOWilson is pleased to bring to our customers a range of Linear Chain from GROB GmbH.

Made in Germany, this product has proven widely popular and offers variety in functionality when designing linear motion and automation.

When space is limited or screw jacks and linear actuators aren't available in the specific size or functionality that your design requires, Linear Chain might just be the solution you're looking for.

The full range of Linear Chain offers thrust from 3kN to 35kN and, thanks to its unique locking design, can push as effectively as it pulls, then coiling to be stored unobtrusively in a storage device.

Very long strokes are possible, as well as extreme temperatures (-40°C -> 1,000°C).

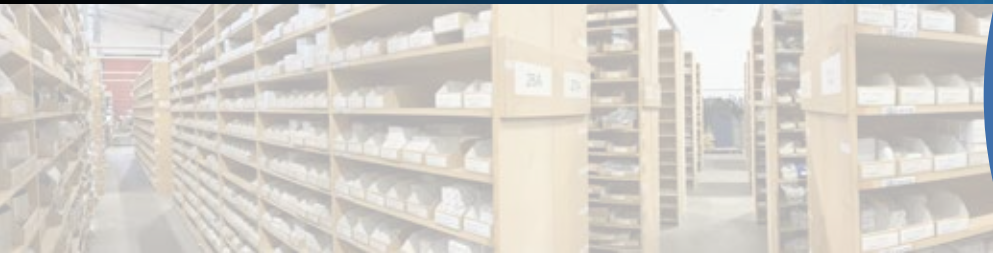

Examples of applications in which Linear Chain is already successfully implemented are:

- Lifting Tables
- Stage Platforms
- Warehouse Logistics
- Refrigeration Systems / Industrial Freezers
- Modern Building Systems
- Driverless Transport Systems
- Industrial Ovens
- Feeding Furnaces

If you would like to learn more about the GROB Linear Chain range or speak to one of our technical engineers about your application requirements don't hesitate to reach out to us at:

Mechanical Seals & Refurbishment

SiL delivers a cost-effective, as-new, refurbishment service for virtually any mechanical seal, whether our own or our competitors' products.

Available at our service centres and supported by our highly skilled technical specialists, our refurbishment service offers a cost-effective and environmentally sound alternative to purchasing new seals.

Disassembly & inspection
Ultrasonic cleaning

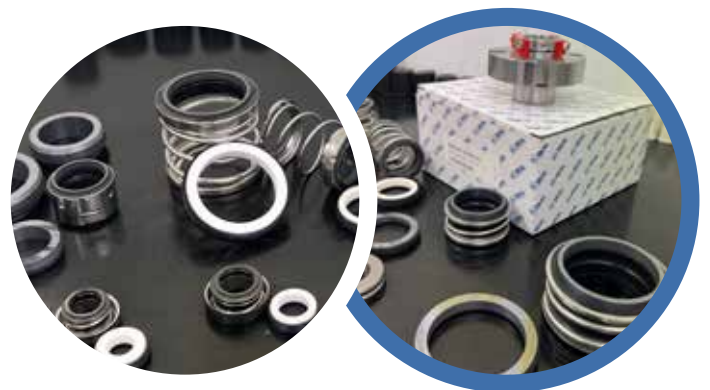

Condition report
Lapping & polishing

Seal assembly
Pressure testing

SiL carries mechanical seals for a wide range of applications and industries, and are suitable for all common pumps, agitators and compressors. This includes seals for standard water pumps as well as submersible pumps. Our mechanical seal range includes seals for a range of industries:

- Food, beverage and dairy
- Pulp and paper
- Agricultural
- Mining
- Oil and gas
- Pharmaceutical
- Wastewater
- Chemical

We can supply seals in a variety of materials which means there is no industry or application we can't offer a sealing solution for.

Seal Innovations is a division of Motion New Zealand, along with other long-standing brands including SAECOWilson, HCD Flow Technology and Conveyor & Transmission (C&T).

The **(SiL)** Guarantee

Upon receipt of your mechanical seal our repair team guarantee:

- Quote 2 business days
- Repair 2-5 business days
dependant on availability of parts

95% of our seals are quoted and serviced in 2-3 business days.

SEAL INNOVATIONS

Exclusive NZ Distributer of KLINGER Sealing Products

In late 2020 Seal Innovations (SiL) partnered with KLINGER Australia to become the KLINGER exclusive distributor in New Zealand for sealing products. This agreement also includes access to the full range of KLINGER products.

Combining the strength of international research and development with the advantage of offering manufacturing flexibility, technical expertise, support, and the sales distribution network power of Seal Innovations.

- » Tailored solutions for a wide range of industries
- » Multiple distribution points across New Zealand
- » Large inventory available nationally
- » Full inhouse technical and engineering support
- » National field support to help you with all your gasket, sealing and fluid control needs

Technical Support

KLINGER and SiL are committed to providing the highest levels of technical support. Our partnership brings practical advice along with online tools and access to handy resources.

Gasket Selection

Selecting the right gasket material is critical to the effective operation of a reliable joint. KLINGER offers a material selection and application appraisal service to ensure the correct gasket is used first time, to avoid unscheduled shutdowns and refits.

Torque Calculations

Insufficient or excessive loads are among the most common factors contributing to joint leakage. The technical services department can provide detailed calculations with explanations of why optimum gasket stress is so important in successful gasket installation.

Gaskets Group

The Gasket group at SiL has a CNC operated Atom cutter. This gives us the cutting capacity to customise to our customer requirements.

We can offer gaskets for any application manufactured from KLINGER sealing products.

We strive to achieve by providing best-in-class sealing solutions that allow our customers to operate their plants, complete projects, and start up from turnarounds safely and efficiently.

We aim to help customers achieve zero leaks on machine start-up and throughout the operating cycle.

SEALING SOLUTIONS

Compressed Fibre / PTFE / Graphite Gaskets

KLINGERSIL® C4430

It is resistant to oils, gases, salt solutions, fuels, alcohols, moderate organic and inorganic acids, hydrocarbons, lubricants and refrigerants.

KLINGER® TOP-CHEM 2000

The only PTFE gasket worldwide to have been awarded a Fire Safe certificate. Primarily used in the chemical, petrochemical and maritime industry.

KLINGER® GRAPHITE LAMINATE PSM

Made of expanded graphite with an 0.1 mm thick insert of tanged stainless steel and featuring adhesive-free bonding, this gasket material is ideal for hot water and steam applications.

SEALEX® JOINT SEALANT

Specially processed, 100% pure PTFE on a roll, provides soft, highly compressible gasketing for longer life and trouble-free sealing.

WRAP SEAL QUICK REPAIR KIT

Suitable for offline pipe leak repair for low pressure general pipe medium. Works on any metal or plastic pipe. Safe for drinking water and resistant to most chemicals.

Industry-leading Range of Gaskets and Sealing Materials

SPIRAL WOUND GASKETS

Have the ability to recover under the action of fluctuating loads caused by process fluid pressure and temperature changes, flange face temperature variations, flange rotation, bolt stress relaxation and creep.

RING TYPE JOINTS

Metallic ring joint gaskets are heavy duty, high-pressure gaskets largely used in offshore and onshore petrochemical applications.

KAMMPROFILE GASKET

Fire Safe to API 6FB, a composite gasket which utilises a serrated metal core with a soft facing material. The metal core is machined on each contact face with concentric serrations which provide high pressure areas.

THREAD TAPES

100% PTFE and hence are inert and resistant to most media.

- » Commercial Grade (white) for general services: 12mm x 0.075mm x 10m
- » British Standard (white), BS 7786: 12/19/25mm 0.076mm x 10m

Control of Leakages from Pumps, Valves and Other Static Applications

STYLE K10

Applications

Water, mild acids and alkalis, mild slurries.

STYLE K11

Applications

Water, mild acids and alkalis, mild slurries. Suitable where the use of a non contaminating packing is not important.

STYLE K3222

Applications

A cost effective general purpose packing for use in non abrasive applications on pumps and valves within all industries.
